FAIRVIEW ORES CARRY THE COIN

W. H. Dale Tells How Mines of the District Are Showing the Values.

WILL INVADE DEEP CREEK

the richest and strongest ledges in the mining regions of the west exist in the mountains about Fairview and that many great mines can safely be depended upon to result from develop-

WILL INVADE DEEP CREEK.

Men From Here Are Going After Some of the Good Things.

Equipped with one of the finest outfits for prospecting and traveling in comfort through the mineral-bearing region to the west of the great desert, Charles K. Rowland, the well-known mining man of this city, and James Blythe Anderson of Lexington, Ky., a business man owning large interests in the Blue Grass state, will pull out from here on Tuesday. They expect to be gone anywhere from a few weeks to a few months and are going prepared to stay in the field until they find some-

Mining properties and prospects in Yankee Consolidated Deep Creek region, the riches of which have been preached for many years and which are now beginning to attract particular attention on account of the building of the Western Pacific railroad, will receive particular attention, as will the entire country through to Cherry Creek and Ely.

This pilgrimage into the great mineral-bearing country beyond the desert is the culmination of investigations that Mr. Rowland has been making for several months past, and when he and Mr. Anderson return they will not be empty handed. Mr. Rowland has been repeatedly urged by eastern business associates to find something in the country mentioned that it would pay to and, during the few months that Mr. Anderson has been looking into propositions in this region he has come to the conclusion, with Mr. Rowland, that the section to receive attention is, in fact, "the promised land," from a mining standpoint.

Already the country is being invaded from the Ely side, and, within the last few weeks many transfers of mining Orem Syndicate Will Erect it Near property have been reported. At the same time prospectors are swarming in and information which invariably

shareholders. The strike was made in portion of the regular pulp the assays No. 2 shaft, and the dispatch stated ran up to \$54.86 per ton. It was the that six feet of ore that averaged \$168 opinion of Assayer Hanauer that had per ton had been opened up. Every-

message from camp also states that thirty feet of shipping ore has been developed in the Mohawk company's property, the control of which rests with George Wingfield and his associates at Goldfield.

MINING STOCK EXCHANGE.

Little Bell Has Been the Sensation of Past Week's Business. More business was done on the local

NEW YORK BONANZA REPORTED

OPENING UP BIG.

W. H. Dale returned from an extended trip to the Fairview district. Nevada, Friday night and like everybody who has reported on the new camp, he prodicts a brilliant future for it. The camp is practically controlled by Salt Lakers. The mines of the Nevada Hills mines company, the proposition in which John T. Hodson, W. V. Rice and others of this city figure so prominently, are phenomenal controlled by Salt Lakers. The mines of the Nevada Hills mines company the proposition in which John T. Hodson, W. V. Rice and others of this city figure so prominently, are phenomenal controlled by Salt Lakers. The mines of the Nevada Hills mines of provided the property of the Nevada Hills mines and developments of the Nevada Hills mines and developments of the next few months or less is expected to prove it. While Mr. Dale left camp went \$5,189 in gold and silver. Adjoining this property are the four claims landed by Ben D. Luce for D. H. Peery and others and in which Mr. Dale had the next few months or less is expected to prove it. While Mr. Dale did not say so, it is understood that a gash offer of \$30,009 for the group was promptly turned down by the owners, and provided the property to the sale of the propert NEW YORK BONANZA REPORTED the last four or five years. NEW MILL FOR BINGHAM.

the Red Wing Compressor.

In order that they may handle their In order that they may handle their concentrating ore to better advantage, the Orem syndicate is to build a 200-ton mill next to the Red Wing compressor at the foot of Markham gulch. Bingham. For some time the necessity of this acquisition has been felt and the management finally decided to build right away. The ore of the three Orem properties is at present being treated at the Dewey mill, and at that only the better quality of ore is being sent to the mill. As soon as the new mill is completed all of the inferior ore which has some values will be treated by the company itself, and much of the ore which is now on the dump will be concentrated.

per ton had been opened up. Every-body in Salt Lake knows "Billy" Griffith, and no one will begrudge him the good fortune which appears to be head-of the four big slabs of the rock, it will be remembered, gave an average of the four pieces of \$41 per value for the four pieces of \$41 per

Such values in 500-pound chunks of ledge croppings ought to convince the most skeptical that the new strikes in the vicinity of Osceola are not only genuine, but entirely out of the ordinary. It is not necessary to dwell on feature of the business, because a letter from camp yesterday, written by R. A. Millick, who is in charge of the properties from which the sam-ples came, says that people are pouring into the district from all direcnining exchange during the past week tions. He also reports a strike of two than has been seen for a like period in the last four or five years. In all 492,783 property, near where the ore exhibited

Property by lessees.
Following is the list of final quotations and record of sales made during yesterday's single regular and open board calls: pick has never been stuck, as yet, but which is counted upon to make a noise when opened. Croppings can be taken anywhere, and all of them show copper, silver and gold in quantities that are suggestive of big values at depth.

BOSTON MARKET CHEERLESS.

Prediction Comes That Prices Will Go Lower Than Past Week.

No special quotations on the range soston copper stocks and the amount dealing in them have been obtainable through Pollock & Co. for the past few days owing to wire troubles. Yesterday the market letter of Paine. Webber & Co. came through all right, but the quotations were againg lacking. The tone of the letter is anything but cheerful and predicts lower prices next week. It reads as follows:

as follows:
"Boston, April 28.—We have had very heavy liquidation for two days and prices are several points lower than they were the first of the week, when we so strongly advised selling stocks. The situation is not clear and we shall probably see even lower prices next week, so we still advise sale of all classes of securities on any rally which may be caused by short covering. This market has every indication of being lower next week."

CRESCENT PEAK OPERATIONS.

Shaft on Company's Ground Is Now Nearing the Sulphide Zone.

Nearing the Sulphide Zone.

J. E. Hogan, treasurer of the Crescent Peak Gold Mining company, returned from a trip to the company's property in the Crescent mining district. Nevada, yesterday morning. He reports that the shaft on the property is now down nine-ty-one feet, every foot of the distance in ore, though not high grade. Samples of the rock from the bottom, tried out during the day, showed values of \$6.80 in gold and \$2.21 in silver per ton. When water level is reached it is expected that a great change for the better will occur.

Already, Mr. Hogan states, the ore is beginning to show signs of changing to a sulphide, a feature of the district that is considered a sure sign of permanency and value in the ore. The shaft is being sunk in the vein for the particular purpose of demonstrating its value. This established, it is the intention to drive a tunnel and cut the vein at a vertical depth of 500 feet, thus providing a large area of stoping ground.

A Great Gold Mine Right Next Door to the Richest Mine in All Manhattan

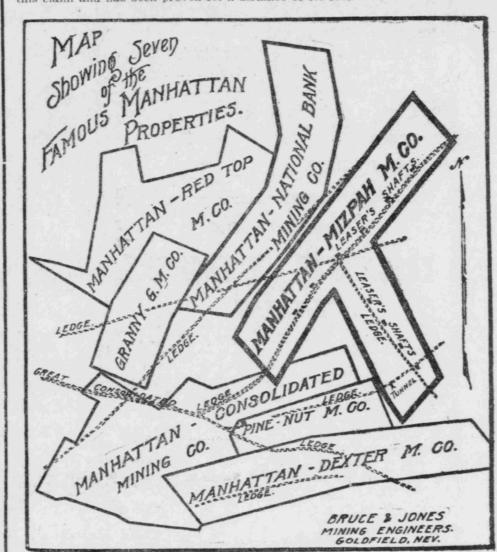

Side Lining the Great Manhattan Consolidated. End Linking the Dexter and Pine Nut.

THE SAME GREAT GOLD BEARING LEDGES WHICH HAVE MADE THE MANHATTAN CONSOLIDATED FAMOUS CAN BE TRACED BY BOLD SURFACE CROPPINGS ACROSS THE PROPERTY OF THE MANHATTAN MIZPAH. THESE LEDGES HAVE BEEN OPENED AT A DOZEN POINTS ON THE KENTUCKY, ARKANSAS AND CAPTAIN SAM CLAIMS, REVEALING UNIFORM SHIPPING VALUES. The Pine Nut Ledge is traceable for 800 feet across the Captain Sam. This marvelous deposit of gold bearing ore, ranges from 15 to 20 feet in width, and gives a general assay value of \$75 per ton. A four foot ledge has been opened at six places on the Kentucky giving a uniform value of better than \$100 per ton. This ledge is the same vein from which sensational values are being taken on the Consolidated. At every point where these ledges have been opened on the Kentucky and Captain Sam, they have stood the most exhaustive tests and given values of from \$75 to \$100 to the ton. The vein on the Kentucky has been proven to a depth of 80 feet, and has broadened out and become richer with depth. On the Arkansas two ledges averaging from four to six feet in width reveal values of better than \$100 per ton.

Exceptional Stock Offering. 25c a Share. A GOLD MINE FOR THE PRICE OF A PROSPECT.

One hundred thousand shares of treasury stock in the Manhattan Mizpah Mining Company is offered to the public at 25c PER SHARE.

This remarkable offer cannot and has not been duplicated in the Manhattan district. Not only is the Mizpah Company's ground the cream of all Manhattan, but it embraces a large acreage,—three claims or about 60 acres. Its territory is as large as the Consolidated, and three times that of the Pine Nut. It has a continuation of the Consolidated ledges. All along these great ore deposits on the Mizpah Company's ground the leasers have opened up the veins. On the Kentucky one set of leasers alone have opened up a four foot ledge for four hundred feet which averages straight across shipping values, or values of more than \$100 per ton. Almost an equal amount of work has been done on the Captain Sam. The Pine Nut ledge crosses this claim and has been proven for a distance of 800 feet.

Ours Are Aristocratic Neighbors.

ROUNDED ON ALL SIDES BY THE GREATEST MINES IN THE MANHATTAN DISTRICT.

The Kentucky claim side lines the Great Consolidation, admittedly the richest of all Manhattan gold mines. Four months ago its stock was selling at 15 cents. It is today in active demand at TWO DOLLARS PER SHARE. THE CAPTAIN SAM CLAIM ENDLINES THE DEXTER AND THE PINE NUT. DEXTER IS SELLING AT \$1.00 PER

SHARE AND PINE NUT FOR 50c PER SHARE. Five leasers are working on the three claims and have opened nense gold hearing ledges and the property will soon join the list of shippers of high grade ore.

THE MANHATTAN MIZPAH MINING CO.

Capitalization, \$1,000,000. Par Value, \$1 Per Share.

400,000 Shares in Treasury. Fully Paid. Non-Assessable. Mining Engineer. Mine Operator.

ASSISTANT SECRETARY.....JOHN M. FAIRFIELD

DIVIDENDS FOR YEARS.

In making this offer to the public we will add another to the long list of successful companies that we have launched toward the dividend paying estate. The immense ore bodies that have been opened up, even at this early day in the history of the mine, insure, dividends for every shareholder for many years. For

IMMEDIATE PROFIT OR DIVIDEND RETURNS Shares in the Manhattan Mizpah Company are most attractive to either the small or large investor. Any person familiar with the conditions at Manhattan will know at a glance at the map and see that no better property could be purchased,—it is the best in the district. The Consolidated Mine is the MARVEL OF THE MIN-ING WORLD. The scores of engineers who have experted it pronounce it one of the greatest mines in Nevada. As the Consolidated is a great mine, so is Manhattan a great camp, one for which there is scarcely a parallel in the annals of western mining operations. The Manhattan Mizpah WILL BE AS GREAT AS THE CONSOLIDATED. There will be no second offering of this stock. It will be over-subscribed many times. It is beyond any question the cheapest stock to which public subscription has been invited since the first fabulous values were found at Manhattan. This firm has a REPUTATION TO SUSTAIN. In Goldfield and Bullfrog it has made a distinctive success of its every mining enterprise, and thousands of our clients who purchased stocks upon our advice have coined money through their investments. In Manhattan we were first on the ground, and each of our five companies in that camp are MAKING GOOD WITH RAPID STRIDES. The stock of the Manhattan Mizpah is eas ily worth 50 cents per share. Any broker who sees the map will at once tell you as much. The Pine Nut Company, owning a fraction adjoining the Mizpah group, put out its treasury shares at 50 cents, and the allotment was over-subscribed several times within few hours, STOCK in THE MANHATTAN MIZPAH WILL BE WORTH FIVE DOLLARS A SHARE WITHIN TWO YEARS. Remember our prediction. Make a memo, of it and consult the stock quotation sheets at the end of 24 months. If you want shares in this excellent company you will have to act quick. Either send us YOUR RESERVATION BY WIRE or CONSULT OUR LOCAL REPRESENTATIVES.

Manager of Patsy Clark's Mines Taking in Two Carloads.

Mine Manager L. S. Cates of the Boson Consolidated was in town yesterday
conferring with President Samuel Newhouse and explaining what development
its fund held for re-insurance, \$20,892.64.

The company has no liabilities whatever aside from its capital of \$250,000;
its undivided profits of \$136,041.17 and
its fund held for re-insurance, \$20,892.64.

First publication April 24, 1306.

of Utah, have just issued a circular letter to all agents of the company which will be of interest to the general public in view of the fact that Home Fire policies are so widely held by in-surers in Utah and Idaho. The letter states that the Home company never wrote a dollar insurance in the state of California, hence is unaffected by the losses there. The risks of the Home are widely scattered throughout Idaho and Utah, and the company therefore, stands no chance whatever of such losses as others sustain who write so heavily in a single district. The two great companies with which the Home Fire of Utah has re-insur-

Guarantee Hamlin Paints

Assessment No. 5.

The two great companies with which the Home Fire of Utah has re-insurance contracts are the Hartford of Hartford, Conn., and the North British & Mercantile of London, England. The former has \$18,000,000 fire assets, and the latter \$20,000,000 fire assets. The San Francisco losses of both will be promptly paid from the reserves, and in the case of the North British & Mercantile, the money will come from the English department.

The last statement of the Home Fire of Utah shows that its capital and surplus are invested in the best line of Utah securities and real estate. The figures are as follows

ASSETS.

Book value, \$406,933.81.

Market value, \$509,829.31.

The company has no liabilities whatever aside from its capital of \$250,000; its undivided profits of \$136,041.17 and its fund held for re-insurance, \$20,892.64.

ASSEMBAN ASSETS.

Book value, \$406,933.81.

Market value, \$509,829.31.

The company has no liabilities whatever aside from its capital of \$250,000; its undivided profits of \$136,041.17 and its fund held for re-insurance, \$20,892.64.
